Simulator
CityFlow

Cross-simulator Calibration and Support

Aim 1: Integrated System:

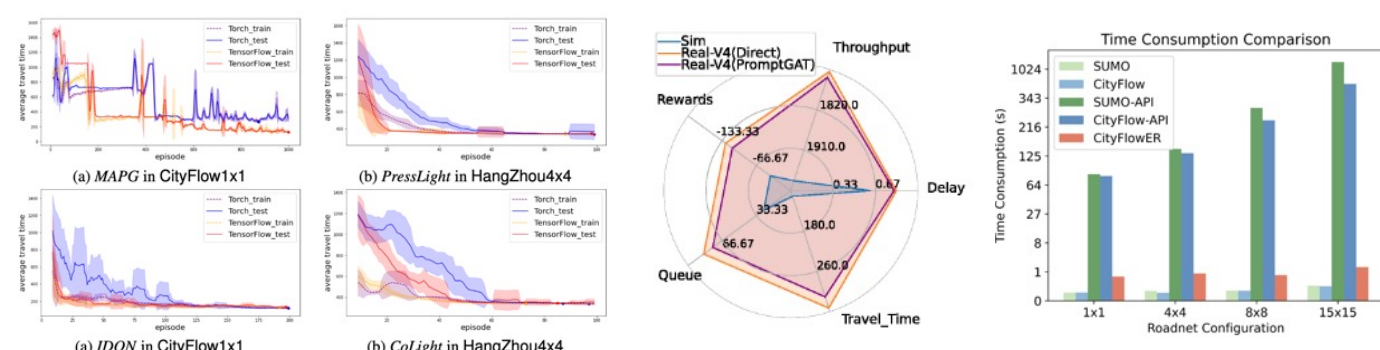

- Unified API/schema
- Parity suite and migration toolkits
- Easy-to-use environments for adoption

Aim 2: Continuous, Distributed Development and Deployment:

- Single pull request path for all
- Cross-sim CI checks
- Monthly reproducible releases

Aim 3: Governance & Community:

- Effective governing committee
- Developer and user growth
- National interest and commercialization

Comparable, reproducible, accessible for all

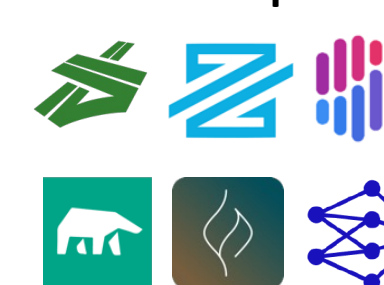

Academic Community

Industry & Gov.

Small & non-profit

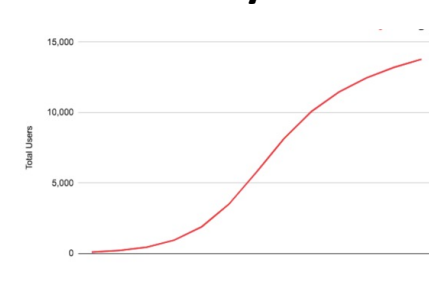

Standardized dev. and release for community

Governing Committee

Community Growth

National Interest

Long-term visions, goals, and community
